Art Unit: 1621

#### **DETAILED ACTION**

Claims 1-8 are pending in this application.

### Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 1/28/04 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1, 3, are rejected under 35 U.S.C. 102(b) as being anticipated by JP 04202336.

JP'336, page 303, compound (IX), and page 300, column 2, line 8-11, anticipate instant claimed compounds, when in the instant claimR1 is –CH<sub>2</sub>-CH(OH)CH<sub>2</sub>OH, and on page 300, chloride salt is also made.

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/765,602 Page 3

Art Unit: 1621

5. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 7. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over combined teachings of Smith et al and JP 4-202336.

Smith et al(US 6,331,293) teach structurally similar compounds as claimed herein, see for example, column 3-4, top compound and column 1-2, top two compounds. The difference between the reference and herein claimed compounds is in terms of the salt of the compound. In the reference phosphate salt is taught as against chloride salt in herein.

Application/Control Number: 10/765,602

Art Unit: 1621

JP'336 is teaching structurally similar compounds as claimed herein it is expressly taught the equivalence of chloride, phosphate and nitrate, see page 300, column 2, lines 8-11.

It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to modify Smith et al by obtaining chloride salt as taught by JP'336, because the latter reference is expressly teaching the equivalence of chloride, phosphate and nitrate salt.

8. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 4-202336.

JP'336 teaches structurally similar compounds as claimed herein, see for example, compound (IX), on page 303. The difference between the reference and herein claimed compounds is that the reference is teaching nitrate salt as against chloride salt in herein. However the reference on page 300, column 2, line 8-11, expressly teach equivalence of nitrate salt and chloride salt. Thus one of ordinary skill in the art would be motivated to arrive at the claimed chloride salt of the reference because the reference is teaching equivalence of chloride and nitrate salt.

- 9. Claims 2 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 10. Claims 5-8 are free of prior art and are allowable.

Application/Control Number: 10/765,602

Art Unit: 1621

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHAILENDRA - KUMAR whose telephone number is (571)272-0640. The examiner can normally be reached on Mon-Thur 8:00-5:30, Alt Fri.
